

Foothill Flyers
Wednesday Night Street Routes

The Route Directions Guy strongly suggests that you print this PDF. By having your own, you will not need to count on that notoriously unreliable route-directions guy being there.

These are only the suggested turn directions. There are many ways to go out and come back - and we always hope that you come back - these are just some ways to do it.

If you print these sheets, then cut them in half (you have to guess which way), then fold each one in half (again, you have to guess which way), each one will fit quite well into a nice sweat-proof Sandwich baggie.
